3)Contact us...

4)About...

INTRODUCTION ABOUT PROJECT

*We designed 4 pages i.e. Home,about,order food,contact us.

*The Home page contains the navigation bar by clicking on the particular link you will be directed to that page.

*About page contains the information about the website.

*Using order food section,passenger can order food of any type.

*Using contact us section,the viewers can contact us.

TAGS USED IN THE “HOME” PAGE

- Here we have used header to create the navigation bar , graduation-cap logo is used in the left corner.
- We have use tag to create a list and use css to make them in a row by using display : flex.
- We have use many tags of css like border-radius, align-items, padding (to give space between content and border of the component) , fontweight, font-size, box-shadow, text-transform and many more.
- One of the property of the header section is that it is sticky i.e. its position is fixed.
- We also have used css elements such as justifycontent: center to make it in center.

TAGS USED IN “Order food”

- Here we have used header tag to write heading.
- we have use<p> tag for paragraph writing.
- We have use many tags of css like border-radius, align-items, padding (to give space between content and border of the component) , fontweight, font-size, box-shadow, text-transform andmany more.
- We have inserted a image here by using tag with class “ image” and give the path and name of the image

TAGS USED IN “CONTACT” PAGE

*In this section we have provided the form to contact to us for suggestions, feedback and for any query.

* We have attach here an image by using tagWe have used here the <form> tag to create a form.

*We have used a <div> tag to create a division with class = “form-container”.

*Then we have used form elements to create theform such as <input type=“text” > to take name asinput from the user, <input type=“email”> to takeemail I’d from the user, <input type= “number”>to take phone number, <textarea> to takesuggestions, feedback and any query.

- *Then a send(message)button is created by using <input type="send" value="message">.

- * CSS is then applied to fix color, size, align-items (to align the items in the desired direction) etc

SCREENSHOT OF CONTACT US PAGE

The screenshot shows a web browser window with a contact form overlaid on a background image of a railway track in a forest. The browser's address bar shows the file path: `C:/Users/91743/AppData/Local/Temp/Rar$EXa12692.10689/index.html`. The contact form is titled "Contact Us" and contains four input fields: "FULL NAME :", "EMAIL :", "PHONE NUMBER :", and "MESSAGE :". Each field has a placeholder text: "Enter Your Name", "Enter Your Email", "Enter Your Phone Number", and a small icon in the message field. A blue "SEND" button is at the bottom of the form.
